

1. The first group of respondents (10%) was composed of individuals who had been involved in a sexual assault in the past 12 months. This group was further divided into two subgroups: those who had been the victim of a sexual assault (5%) and those who had been the perpetrator of a sexual assault (5%).

2. The second group of respondents (20%) was composed of individuals who had been involved in a sexual assault in the past 12 months, but who had not been the victim or perpetrator of a sexual assault. This group was further divided into two subgroups: those who had been the victim of a sexual assault (10%) and those who had been the perpetrator of a sexual assault (10%).

3. The third group of respondents (30%) was composed of individuals who had been involved in a sexual assault in the past 12 months, but who had not been the victim or perpetrator of a sexual assault. This group was further divided into two subgroups: those who had been the victim of a sexual assault (15%) and those who had been the perpetrator of a sexual assault (15%).

4. The fourth group of respondents (40%) was composed of individuals who had been involved in a sexual assault in the past 12 months, but who had not been the victim or perpetrator of a sexual assault. This group was further divided into two subgroups: those who had been the victim of a sexual assault (20%) and those who had been the perpetrator of a sexual assault (20%).

5. The fifth group of respondents (50%) was composed of individuals who had been involved in a sexual assault in the past 12 months, but who had not been the victim or perpetrator of a sexual assault. This group was further divided into two subgroups: those who had been the victim of a sexual assault (25%) and those who had been the perpetrator of a sexual assault (25%).

6. The sixth group of respondents (60%) was composed of individuals who had been involved in a sexual assault in the past 12 months, but who had not been the victim or perpetrator of a sexual assault. This group was further divided into two subgroups: those who had been the victim of a sexual assault (30%) and those who had been the perpetrator of a sexual assault (30%).

7. The seventh group of respondents (70%) was composed of individuals who had been involved in a sexual assault in the past 12 months, but who had not been the victim or perpetrator of a sexual assault. This group was further divided into two subgroups: those who had been the victim of a sexual assault (35%) and those who had been the perpetrator of a sexual assault (35%).

8. The eighth group of respondents (80%) was composed of individuals who had been involved in a sexual assault in the past 12 months, but who had not been the victim or perpetrator of a sexual assault. This group was further divided into two subgroups: those who had been the victim of a sexual assault (40%) and those who had been the perpetrator of a sexual assault (40%).

9. The ninth group of respondents (90%) was composed of individuals who had been involved in a sexual assault in the past 12 months, but who had not been the victim or perpetrator of a sexual assault. This group was further divided into two subgroups: those who had been the victim of a sexual assault (45%) and those who had been the perpetrator of a sexual assault (45%).

10. The tenth group of respondents (100%) was composed of individuals who had been involved in a sexual assault in the past 12 months, but who had not been the victim or perpetrator of a sexual assault. This group was further divided into two subgroups: those who had been the victim of a sexual assault (50%) and those who had been the perpetrator of a sexual assault (50%).
